Statistics

SERVICES-PRODUCING INDUSTRIES LEAD THE WAY IN 1999

INDUSTRY HIGHLIGHTS

- Led by strong growth in the service-producing industries, the Manitoba Bureau of Statistics estimates that **Manitoba's GDP advanced 2.2%** in 1999 in constant 1992 dollars, above the ten-year average growth for Manitoba of 1.6%.

- **Service-producing industries expanded 3.4%, the biggest increase in the 1990's**. These industries surged as a result of Pan-Am games spending, increased spending due to tax cuts and higher government expenditures. The **goods-producing industries**, hampered by a large downturn in the mining industry, **decreased 0.5%**.

- In **current dollar terms** (not adjusted for inflation), the economy grew **3.8%.** Inflation advanced 1.5% largely as a result of increased prices for commodities such as oil and metals.

- After being the engine of growth for the Manitoba economy in the past few years, **manufacturing slowed in 1999 advancing 1.2%**. A 0.1% decline in international exports, along with a slow year for machinery and equipment manufacturers, were the chief causes for the slowdown.

- **Agricultural output shrank 3.1%** in 1999 as a result of low crop yields. Increases in livestock production, which saw a 7.1% increase in cash receipts, partially offset the poor crop performance.

- Slowed by a two-month lockout at Inco, **mining output declined 9.2%**. Low prices for metals at the beginning of 1999 also slowed production. Prices rose sharply throughout the year indicating a better year in 2000.

- The **accommodation, food and beverage industry** (6.9%), as well as the **other services** (6.0%) and **retail trade** (3.7%) industries all had good years in 1999.

- Boosted by the largest increase in government spending (in constant 1992 dollars) since 1992, the **government sector** advanced 1.6%. Increases in the health and social service industry (3.8%) and education (2.0%) also reflected the increase in expenditure.

- Benefiting from a good year in manufacturing in the rest of Canada, the **transportation and storage** industry advanced 5.3%.

Note to Users

This publication provides revised annual estimates for the industrial performance of the Manitoba economy from 1993 to 1999. Preliminary projections for 1999 in current dollars were released in April 2000.

This is one of two annual reports released dealing with the provincial economy. This report focuses on the industrial performance of the economy while the other report provides information on the income and expenditure accounts.

This publication provides revised estimates for the industrial economic performance in Manitoba for 1999. These estimates keep the growth rate of GDP at factor cost at 2.2%. Some revisions did occur to components of GDP as a result of the four-year revision in the National Accounts data released by Statistics Canada.

As a result of these revisions, MBS' growth rates have changed only slightly as can be seen in the table below.

GDP $1992	1993	1994	1995	1996	1997	1998	1999
MBS – Current	0.9	3.6	0.9	2.1	4.2	3.2	2.2
MBS – Previous	0.9	3.6	0.9	2.1	4.0	3.3	2.2
